### **ABSTRACT**

In this article some scientific problems of Iran were reviewed. My own problems and honors were also mentioned. It was concluded that Iran and I will not become anything in the science, I have no intelligence and Iran and I will not become anything in general. Therefore, according to the principles of DEPRESSIVE REALISM, I must always be happy. Also it was deduced that the only way for the advancement and development of Iran is to make Iran as a state of USA.

**KEYWORDS:** Politics, Science, Petition, DEPRESSIVE REALISM.

### **1- INTRODUCTION**

Voice of America (VOA Persian) has issued an article [1] that is in the same line with this paper. In fact, that article from VOA Persian confirms this paper. Also Eminent Crown Prince of Iran, Reza Pahlavi has a saying from Atamalek Joveini about Iran Islamic Regime as “They came and dug and burned and killed and took away and went” [2] which approves this paper.

### **2- DISCUSSION**

The science which is produced by Iran is not valuable. Only the science which is produced by superpowers is valuable. Superpowers do not give a large part of their discovered science to public access and they keep it secret [3]. Iranians must do something for the superpowers to give their science to Iran. The only way that I strongly suggest for Iran to reach the science of

superpowers is to make Iran a state of USA. I have said this fact in my 9 articles titled “Criticism of the Current Science in the World” and “its 8 Addenda” [4 to 12] which were published in international journals and are accessible in my website [13]. Also I have created a petition in internet for everybody to sign it and make Iran a state of USA [14]. In order for a person to be able to produce the science, he/she must have the highest level of science. But a large part of discovered science is kept secret [3]. Therefore, the science which is produced in Iran is invaluable. It can be concluded that Iran universities are waste of time and are established to make the people busy with science for them not to think of politics. Therefore, the political rulers of Iran will have no competitor. The money and other benefits of political activities is much higher than any other activities in Iran. The universities in superpowers are also expository only and have no scientific value. Superpowers do not give a large part of discovered science to public access. I know the scientific conditions of superpower universities and as 1 proof, you can see that MIT (Massachusetts Institute of Technology) from USA as the top world university has given its courses contents in its website for free [15]. One will find that only a small part of USA science is given in this university and a large part of world science is kept secret. In fact, I like this action form MIT which says that do not come to USA for studying in MIT to become a top scientist since it is not valuable and a large part of discovered science is kept secret. Another great job from superpowers is creating free PORN websites and satellite channels to say to Muslim people that do not come to superpowers for sex. It should be noted that many people in Muslim countries want to immigrate to superpowers in which there is freedom in sex against Muslim countries where sex is banned in all types except marriage between men and women.

Iranian governors have established IRAN NANOTECHNOLOGY INNOVATION COUNCIL [16] to say to the world that Iran has reached the highest peaks of the Nanotechnology and science. Now let's have a deep look at Nanotechnology in Iran. In order

to show the benefits of created science of Nanotechnology in Iran for the field of materials science and engineering (called NANOMATERIALS), Iranians use MATERIALS CHARACTERIZATION tools like SEM (Scanning Electron Microscopy), TEM (Transmission Electron Microscopy), XRD (X-Ray Diffraction) and etc. But all of these MATERIALS CHARACTERIZATION tools are innovated and made in foreign countries and Iranians cannot innovate and make the materials characterization tools the list of which can be found in internet [17]. In the case of these common MATERIALS CHARACTERIZATION tools which are imported and used in Iran, I can say that they are not all the materials sciences of the world and they are only a small part of world materials science. Superpowers will never give all their materials sciences to public access and they keep their sciences secret [3]. This fact is true for all branches of Materials Science and Engineering in Iran which use MATERIALS CHARACTERIZATION tools. I.e. you can see that Iran will not become anything in Materials Science and Engineering which includes Nanotechnology.

Undoubtedly, this article and my last articles titled “Criticism of the Current Science in the World” and “its 8 Addenda” [4 to 12] were amongst the greatest articles I have ever seen. These articles were published in international journals and are accessible in my website [13] with their Farsi translations. The initial idea of these articles was given by my university professor Mohammad Jamialahmadi from Petroleum University of Technology as “A large part of discovered science is kept secret and is not in public access”. Professor Mohammad Jamialahmadi was known as the scientific pole of the university. His resume is accessible in internet [18]. He has repeated this principle for many times in the classroom and for all the students but this principle was so heavy such that nobody understood it. This principle is exactly and with 100% similarity mentioned in internet and in “The Encyclopedia of World Problems and Human Potential” as “A considerable amount of scientific research is conducted in institutes or under contracts which preclude dissemination of the results to other than a select

group” [3]. Also there are more than 56000 of such world scientific problems in this encyclopedia that Iran and I cannot solve [19]. Therefore, according to the principles of DEPRESSIVE REALISM, I must always be happy.

During the past 15 years in Iran, I have been fired from work for 4 times, I have resigned 3 times and I have failed in job interviews for 6 times. I had 5 job offers related to my field from foreign countries that later on I found that they were fake, fraud and scam. Now I am jobless and poor. These failures are the symptoms of schizophrenia and were in the line to make me depressed (and for me to catch schizophrenia) and as a proof, you can see my manuscripts of psychiatrist in links in my website [20 and 21]. There is a song of “Shahre Gham” which means “Grief City” in English from Dariush Eghbali which can be listened in YouTube [22]. This song describes my condition very well. I have said in my articles titled “Criticism of the Current Science in the World” and “its 8 Addenda” [4 to 12] that I will not become anything in the science, I have no intelligence and I will not become anything in general. Therefore, according to the principles of DEPRESSIVE REALISM, I must always be happy. These articles were published in international journals and are accessible in my website [13] address with their Farsi translations. But I need money to survive and now I am very poor. I have created a WebMoney (WebMoney is an online payment settlement system) account for financial aid to receive. The account number is Z291871883734 and is in my name. I have previously sent request to Her Highness Mrs. Ivanka Trump and “U.S. VIRTUAL EMBASSY IRAN” to send me financial aid. Financial help from any other sources are also greatly appreciated. I need a salary of at least 3000 USD per month and any other amount of financial aid is really appreciated. I have previously said that mental disorders are for societies of advanced countries who have the highest level of science and therefore according to the principles of DEPRESSIVE REALISM, they get mental disorders [12] which was wrong. Also the art with the subject of DEPRESSIVE REALISM is not limited to superpowers. All the

artists are respected for me. I have watched many movies with the subject of DEPRESSIVE REALISM which describe my condition as “THE SILENCE OF THE LAMBS, 1991”, “RAIN MAN, 1988”, “THE GRADUATE, 1967”, “THE IRON LADY, 2011”, “A BEAUTIFUL MIND, 2001” and etc. All of these were prominent movies and won the ACADEMY AWARD. My life is very similar to the story of these movies. A person like me who masturbates will be addicted to sex in foreign countries where sex is free and will finally marry and will not study anymore since he wastes his time by growing children and this is the story of the movie “THE GRADUATE, 1967” which is the story of my DEPRESSIVE REALISM in foreign countries. Other above said movies are the story of my DEPRESSIVE REALISM in both Iran and foreign countries. Anyway I do not want to continue education since I will not become anything in the science as I have illustrated in this article and in my last articles [4 to 12]. Accordingly, I will not become anything in the science, I have no intelligence and I will not become anything in general. Therefore, according to the principles of DEPRESSIVE REALISM, I must always be happy. Figure 1 is from BABYLON PICTURE DICTIONARY for crazy. He spins his finger around his ear to say that you are crazy. Also he mocks everybody. BABYLON PICTURE DICTIONARY is a valid, reputable and top international dictionary.

Figure 1 - BABYLON PICTURE DICTIONARY for crazy.

In the fields of inspection and corrosion for oil and gas industry in Iran, the highest goal for Iranians is to read and apply the following files (books) all of which are USA innovations and you can see that Iranians have no innovation in this field. Also it should be noted that these files (books) are only a small part of the superpower sciences and a large part of superpower sciences in this field is kept secret [3]. Most Iranians in this field do not understand these files (books) which caused serious and great damages to Iran oil and gas industry like the explosion of TANGE BIJAR GAS FIELD [23] which had a damage and loss of 6 Billion USD for Iran and etc.

There is a famous poem from SAADI SHIRAZI as "... He was neither researcher nor scientist, but a four footed animal on which there were some books..." which describes these Iranian people who do not understand those files (books).

- AWS Welding Handbooks (All Volumes)
- NACE CP1, NACE CP2, NACE CP3, NACE CP4
- NACE CIP Level I, NACE CIP Level II
- ASNT NDT HANDBOOKS (Volumes1 to 10)
- ASM Metals Handbooks
- Publications from AWS, ASME, API, NACE, AWWA, NFPA, ASTM, TEMA, SSPC (SPC), ABS, AAR, AASHTO, AISC, AREA, NBBPVI UBPVLS, FED, PFI, SAE, UL, MSS SP, ASNT, ...

In the fields of inspection and corrosion for oil and gas industry, there are a number of high tech (advanced) NDT and inspection tools that Iran and I cannot innovate and make them. The list of these tools is previously mentioned in one of my articles [4]. Therefore, according to the principles of DEPRESSIVE REALISM, I must always be happy.

I have previously mentioned that prominent people and pages in FACEBOOK have recognized me as TOP FAN which is a great honor for me [24] and I am very proud and happy of it. Recently another prominent and famous page of "U.S. VIRTUAL EMBASSY IRAN" has recognized me as TOP FAN in their FACEBOOK page. The print screen from this FACEBOOK page which shows that I am recognized as TOP FAN is taken and is available in a file in my website [25].

### 3- CONCLUSION

The only way that I strongly suggest for the scientific and economic advancement and development of Iran in all fields (including politics) is to make, regard and announce Iran as a state of USA (United States of America) officially and politically (and totally). I.e. Iran should make and regard itself as a state of USA (United States of America) politically (and totally). I have heard that this idea was first suggested by His Majesty Mohammad Reza Shah Pahlavi for Iran. I have created a petition in internet [14] for everybody to sign it and to make Iran a state of USA. So please sign this petition.
